Segment information

The Group's operating segments are determined based on information reported to the board of directors of the Company, being the chief operating decision-maker (the "CODM"), for the purposes of resource allocation and assessment of segment performance.

Specifically, the Group's reportable and operating segments under HKFRS 8 *Operating Segments* are as follows:

- (i) Building works and trading of construction materials — provision of piling works, excavation and lateral support works, and pile cap construction and building works in relation to the parts of the structure above the ground level and supplying of construction materials (including green building materials);
- (ii) Property development and investment — development and sale of properties and holding of properties for investment and leasing purposes;
- (iii) Property management services — provision of property management services, which include security, cleaning, greening, gardening, repair and maintenance;
- (iv) Health and wellness — provision of health and wellness solution services and supplying of healthcare and wellness related products;
- (v) F&B supply chain — provision of agriculture products, food and beverage materials supply chain business; and
- (vi) Smart logistic and information system — provision of logistics services and information technology development.

In the Previous Period, (i) foundation works and superstructure building works and (ii) trading of construction materials were reported to the CODM as stand-alone business units and constituted separate segments. Following a change in the Group's operating and reporting structure, starting from the year 2022, such business activities are combined into a single segment before being reported to the CODM. Accordingly, the CODM now reviews the Group's internal reporting based on six abovementioned segments. Following the changes of reporting segments, the comparative segment information has been reclassified.

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

The Directors are of the view that the construction business environment in Hong Kong remains tough and the Group faces various challenges including the low bidding price on tenders, increased costs and limited market potential in Hong Kong. The Group is prudent in managing construction business operations and evaluating business development opportunities in Hong Kong to diversify the revenue sources and therefore the Group can minimise possible exposure to the uncertainties in the Hong Kong market.

The Group considers the prospects of the PRC market promising. The Group maintains a diverse range of related businesses in the PRC, such as building constructions, property development, property management services, trading of construction materials (including green building materials), F&B supply chain, provision of smart logistic and information system, and health and wellness. Satisfactory performances were recorded during the Period.

As at 30 June 2022, the Group has six main segments, which are (i) building works and trading of construction materials; (ii) property development and investment; (iii) property management services; (iv) F&B supply chain; (v) smart logistic and information system; and (vi) health and wellness. We seek to achieve synergistic value amongst the segments in order to obtain higher returns and greater business opportunities.

Building works and trading of construction materials

During the six months ended 30 June 2022, the revenue from the building works and trading of construction materials segment was approximately HK\$247.9 million (six months ended 30 June 2021: approximately HK\$225.3 million), which is accounted for approximately 43.8% (six months ended 30 June 2021: approximately 71.9%) of the Group's total revenue. Trading of construction materials includes green building materials. The increase was mainly due to a growth in sales volume of photovoltaic panel materials during the Reporting Period.

Property development and investment

Quzhou — Rural and wellness Project

During the six months ended 30 June 2022, the revenue from the property development and investment segment was approximately HK\$11.8 million (six months ended 30 June 2021: Nil), which accounted for approximately 2.1% (six months ended 30 June 2021: Nil) of the Group's total revenue. The increase was mainly due to property development income of HK\$6.0 million from the launched sales of condominium and rental income of HK\$5.8 million generated from hotel leasing during the Period.

The total site area of the project is approximately 27,920 sq.m, and the gross floor area (“GFA”) thereof is approximately 37,356 sq.m.. The condominium and hotel have been completed in end of 2021, and the Group held a total GFA of approximately 18,599 sq.m. for hotel leasing to generate rental income during the Period.

Property management services

Property management services include security, cleaning, greening, gardening, repair and maintenance in the PRC. As at 30 June 2022, GFA under management provided by the Group was approximately 2.13 million sq.m. (30 June 2021: approximately 1.53 million sq.m.) and the revenue from the property management services segment was approximately HK\$23.4 million (six months ended 30 June 2021: approximately HK\$19.0 million), which accounted for approximately 4.2% (six months ended 30 June 2021: approximately 6.1%) of the Group's total revenue.

F&B supply chain

F&B supply chain includes supply chain services of agriculture products, frozen meat and other F&B materials. As at 30 June 2022, the revenue from the F&B supply chain segment was approximately HK\$85.5 million (six months ended 30 June 2021: approximately HK\$27.5 million), which accounted for approximately 15.1% (six months ended 30 June 2021: approximately 8.8%) of the Group's total revenue. The increase was mainly due to a growth in sales volume of F&B materials during the Period.

Smart logistic and information system

During the six months ended 30 June 2022, the revenue in the smart logistic and information system segment was approximately HK\$0.03 million (six months ended 30 June 2021: HK\$4.7 million). The decrease was mainly due to lesser information system generated as a result of lockdown in Shanghai and Quzhou offices due to Coronavirus disease pandemic (“COVID-19”).

Health and wellness

Health and wellness includes supplying of healthcare products, green food and beauty products.
